2020 THEME

How will we live together?

“We need a new spatial contract. In the context of widening political divides and growing economic inequalities, we call on architects to imagine spaces in which we can generously live together: together as human beings who, despite our increasing individuality, yearn to connect with one another and with other species across digital and real space; together as new households looking for more diverse and dignified spaces for inhabitation; together as emerging communities that demand equity, inclusion and spatial identity; together across political borders to imagine new geographies of association; and together as a planet facing crises that require global action for us to continue living at all.”
