**Architectural Graduate/ Architect Position Opening**

Rara Architecture is a small architecture and interior design studio based in Melbourne.

Rara comes with a strong brand presence and are quickly establishing themselves as a benchmark for leading architecture in Australia. To achieve that, they work tirelessly on building a strong cooperative team that strives toward excellence.

The work consists mostly of residential projects, including new builds, extensions and high end fit-outs.

The current team of 3 is looking to expand into the Sydney market, so is in need of an architectural graduate with 3+ years experience to assist in planning and building permits, as well as to carry out the documentation for the interior design team.

It is highly desirable that this individual has adequate all round experience in residential projects; including preparation of town planning/ building permit packages and full documentation suites, as well as excellent knowledge of Revit.

Since Rara is a small practice, all employees must take responsibility to meet monthly targets and learn to work to a degree of autonomy. To achieve those responsibilities, the ideal candidate should possess:

- A minimum of 3 years experience in Australia, preferably in Melbourne or Sydney
- Exceptional Revit skills
- A thorough understanding of the BCA, Rescode and the planning schemes

Some other ideal skills include – a proactive work approach, high level attention to detail, initiative to assist the team and problem solve, friendly demeanor, ability to understand client requests, highly organised, good understanding of building materials as well as construction costs.

Employment terms are negotiable for the right candidate.
