

We are looking for an experienced person to join our team.

We are a small and inclusive design focused team. We work across a range of interesting projects. From small to medium scale for both public and private clients.

We are supportive of different ways of working. With options available for working conditions of full time, flexible hours and part time depending on what you need.

We choose to run our studio and design projects in a way that aligns with our values. We care about our impact on built and natural environments, and we are mindful of the impact of our work. Most importantly we design for people.

Ideally you will have 5+ years of industry experience in Australia and enjoy project delivery.

If you have the ability to manage a project through design, documentation, maintain quality assurance and have experience in construction administration you would be a great fit for our studio.

Proficiency in Revit and Rhino is preferred however not essential (as some of us were Archicad users in the past ;)

If this sounds good to you we would love to chat so please send your CV and portfolio to

info@walterwalter.com.au

We look forward to hearing from you
