

WORKSHOP ARCHITECTURE

Based in West Melbourne, Workshop Architecture is a vibrant architectural, interior design and urban design practice with an established reputation for an innovative design in the public and private sectors. We are dedicated to a contemporary position in architecture, along with a commitment to creating well-crafted, technically and conceptually resolved projects. We provide a supportive studio environment in where our ambitions as a practice are pursued in good humour and with great care.

Workshop Architecture is looking for a Project Architect to join our practice. The position will be an ongoing full-time role on projects both new and existing. Our work covers a diverse range of clients and building types; from indigenous health and culture to education, tourism, emergency services and the visual arts. Though our focus is on public buildings, we value the architectural opportunities residential projects present.

As a practice of 12, we operate in small teams, each working closely with a director. This size allows us to take on the wide range of project scales that we enjoy. It also allows all architectural staff to lead projects, and contribute to other projects where needed. Wherever possible, we maintain the same team throughout the life of the project. We team up with larger practices in order to be involved in projects of higher complexity and larger scale.

The role is for someone to lead and contribute to new projects, as well as those currently in design. Over time this role has the potential to contribute more broadly to the operation and ambitions of Workshop Architecture: mentoring of staff, representing the practice and collaborating on its development. Requiring a minimum of 5 years' experience, registration is welcome in this role but not mandatory, Revit preferred as we use it across all scales of projects.

Please contact Workshop Architecture at mail@workshoparch.com.au to register your interest and forward CV and portfolio prior to Friday 20.05.2022. Following an interview, the successful applicant will commence as soon as possible.
