

EBD Architects is seeking an experienced, technical Architect or Documenter—with a minimum of 5+ years' experience—to join our Melbourne CBD Studio. We are a small but growing architectural practice, with a balanced interest in the social and aesthetic impact of our work. Our approach to human centred, research-led design is gaining attention and, as a result, we have secured a range of health, aged care, social housing, and education commissions.

We work directly with our clients and end-users, and we invest significant time in the early briefing and later detailing stages of each project. We do not work under novated contracts.

If you have the experience that we need, you already know what the job requires, but we are also looking for someone who wants to make a difference and can see the potential of this budding practice.

If you are happy to work both independently, and collaboratively, we need someone who is highly skilled in technical design, detailing, and documentation, with a love for the craft of architecture, and the ability to detail beautifully and effectively, without micro-management.

You will need advanced knowledge of construction techniques, current planning and building regulations, and will be highly proficient in REVIT—which you will be able to demonstrate—and will have a working knowledge of Autocad and Sketchup. You will work directly with a highly experienced Project Architect, and you will share responsibility for developing our REVIT capabilities, including the production of families/libraries.

We maintain a flexible work model, with at least three days in the studio, but each staff member is responsible for managing their own time and outputs, so part-time applicants will be considered. Staff are also encouraged to spend time on research that informs our practice, and our publication —The EBD Journal.

A generous salary package will be offered, commensurate with ability and experience, with a minimum starting salary of \$70k + Superannuation for the right candidate.

To learn more about EBD, please visit www.ebdpl.com, or visit our journal, www.ebdjournal.com

If you want more from architecture, and believe this position is for you, please submit a maximum 10 page, 10Mb PDF, including a brief cover letter, CV, and a sample of your work to darragh@ebdpl.com
