*Topo (place) ology (study)*

## Architect

### FULL-TIME

Topology Studio was founded in 2012 by Darren Kaye & Amy Hallett on the lands of the Yalukit Willam people of the Bunurong Boon Wurrung peoples of the Kulin Nation. We are a creative, award winning architectural practice based in Albert Park with projects both in Victoria and interstate.

Our body of work includes residential, multi-residential, hospitality and public projects largely in coastal and heritage contexts in both urban and rural locations.

Topology Studio's designs are informed by the unique attributes of each site: the natural, cultural, urban and social landscape. Consideration of the existing context ensures each project is uniquely tied to its place and results in bold and meaningful places.

We strive for a delicate balance between the functional and the poetic and revel in unique and complex projects. Light, proportion, materiality and efficiency are both our tools and our signature.

We are small, design focussed architecture studio seeking a full time registered project architect with 4+ years of professional post graduation experience with the right skills and personality to develop into a senior role in the office.

We are currently working on a diverse mix of projects and are looking for someone that has excellent design and communication skills, great construction knowledge, the ability to work both individually and in teams, and who will contribute to an enjoyable, collaborative studio culture.

The successful candidate must have solid experience in:

- Archi-CAD (Highly Proficient)
- Running a project on site
- Working with commercial or government clients
- Working for a design focussed practice
- Communication with both clients and consultants
- Construction documentation
- Understanding the Building Code

Please note you will not be considered without this required experience

Technical IT knowledge would be an advantage

If you are interested in joining our team, please email your cover letter, CV, and portfolio to [studio@topology.com.au](mailto:studio@topology.com.au)
