

Project Architect

Practice description

For over 25 years McIldowie Partners have been delivering educational, community and cultural buildings for a diverse range of clients. With a strong portfolio of clients across Australia and New Zealand, we are currently seeking to expand our client base even further, building on the base of the past but looking to refresh and remain relevant.

Our mission as a practice is to design enduring places that connect people, communities & the environment.

Job Description

At McIldowie Partners we like everyone to do everything. We don't compartmentalise people into specific roles at specific stages of projects and want our staff to work on projects from inception to completion. We believe that this approach makes our staff more rounded and provides continuity for the client and assists graduates on their path to registration.

Our ideal candidate will demonstrate the following attributes;

- Registered architect with 10+ years of post-graduate experience
- Strong knowledge of Revit with technical skills in all project phases
- Demonstrated experience in education projects, including an understanding of research in pedagogy
- Demonstrated experience in leading project teams, including consultant coordination and mentoring junior architects
- Excellent communication skills, both written and oral
- Preferably have strong experience in working with the VSBA

Office role and responsibility

- Report to the Directors of the practice and work collaboratively with project teams on the delivery of projects from inception to completion
- Take responsibility for more than one project at a time

Remuneration

This is a senior role within the practice and a salary package will be negotiated depending on experience.
