

Practice Description

SJB Architects is an established award-winning medium-sized practice with a broad body of work ranging from large-scale urban development to more intimate residential buildings. We approach design in an integrated way and strive for relevance on every project. Our energetic CBD studio values an open and collaborative way of designing.

Job Description

We are seeking design focused, enthusiastic and passionate architects with a minimum of 5+ years' experience delivering high quality projects to join our team. Experience in mixed-use, multi-residential / hospitality is preferable. Work as part of a project team or manage the design and delivery of projects through all stages.

We are looking for engaged and highly motivated, team-orientated architects to work collaboratively with the directors and project teams to develop and resolve design intent throughout the project lifecycle.

You will have experience working through all project stages and in the development and documentation of complex projects. You must have strong attention to detail, a desire to continually challenge and grow and a passion to deliver outstanding design.

You should also have excellent software skills, with a high level of Revit proficiency preferred. A solid understanding of Australian Standards and Building Codes and an ability to work both autonomously and collaboratively.

Experience Needed:

5+ years of experience.

Program Knowledge:

Proficient Revit skills, Adobe, MS Office.

Enscape / Lumion experience beneficial.
