

# BREATHE

## Now Hiring: Project Architect

Role Available: Immediate

Breathe is looking for an exceptional project architect with 5 or more years full time experience to join our team.

The ideal candidate would have experience working as lead in project delivery, consultant coordination, client liaison, and documentation on complex residential and commercial projects.

### Role & Responsibilities

- Lead and coordinate the design and documentation of multiple projects at various stages of a project's lifecycle
- Encourage better design and sustainability outcomes for all projects
- Respond to complex issues with innovative solutions in a collaborative approach
- Deliver projects on time and on budget
- Effectively manage clients, consultants and technical specialists
- Conduct regular reviews and QA with your project team
- Assign tasks and monitor progress and delivery
- Mentor graduates to grow their skillset
- Work closely with the leadership team to identify target clients and sectors, and contribute to the business planning process where required
- Attend relevant industry events as required
- Develop external relationships with fellow industry professionals to help promote Breathe and its values within the industry

Essential attributes include: tenacity, a thorough attention to detail, problem solving and the strong belief that architecture can be harnessed as a powerful tool for positive change.

The Breathe team work incredibly hard and collaboratively on projects that are focused on sustainable, social and environmental outcomes. It's not always glamorous, it's not always fun, but we are relentless and always strive for the most meaningful solution.

Archicad experience is essential.
