

Project Architect for residential, children's services and small commercial projects

PERMANENT

Summary

Experienced architect who wants to expand their role in all aspects of the Practice moving forward. Designing and managing a diverse range of projects across residential, education, and commercial sectors and be part of a small, highly collaborative, supportive, and enriching design studio located in North Fitzroy.

The Role

The role is for an experienced registered architect (preferably five plus years experience) to join our team. In this role you will lead projects and an ideal person will have:

- A strong design sensibility that can complement our practices emphasis on good design.
- A passion for a considered, sustainable approach to architecture.
- Demonstrate technical abilities and a natural willingness to assist others
- Leadership and project management skills within the Practice and more broadly in the industry
- A sound knowledge of Vectorworks is favorable though not a necessity.

The Practice

Our practice believes that great design is inclusive, collaborative and enriched by methodology. With every project we strive to achieve the best possible environmental & social outcome by using passive and active design principles as well as establishing strong relationships with clients. You'll be entering a studio that is genuinely committed to your professional development and helping you to align opportunities that benefit your career.

Projects

Our Practice has a range of project types which provides great diversity, challenge, and interest. We have continued residential projects but also have several community based projects in childcare and early learning. Other projects include veterinary and orthodontic clinics. We are expert in mass engineered timber buildings and have just completed a five-storey apartment project in Thornbury (CLT). We are endeavoring to incorporate mass engineered timber into a range of future projects because it is a sustainable way to build high performance buildings.

The Benefits

- Career advancement opportunities & a range of project types/scales.
- Inner suburb office location
- Supportive & collaborative team with strong team culture
- Working on projects at all stages, from concept through to construction
- Good salary and benefits.
