

## JOIN OUR TEAM

Law Architects is an award winning, medium sized, well established practice in Fitzroy North. We work in a range of building types, but with particular depth in the education setting.

Right now we are making places where people work, reside, learn and perform.

Our work culture is mutually respectful, friendly, flexible and informal. Due to COVID-19, we are all currently working from home.

Who are we looking for?

- A registered architect (or someone currently undergoing the registration process) with a minimum of 5 years post-graduate experience in Australia.
- You should be an excellent communicator and confident in proposing your own solutions, but do not mind learning from others, sharing knowledge and being transparent and collaborative with colleagues.
- You are capable of clearly communicating with other professionals and builders, making sure that everyone is on the same page.
- Initiative and ownership is highly valued in our office.
- Very importantly, you have experience in educational or institutional or community facility projects, from design through to the end of construction (not design and construct).
- We use Sketchup, Archicad and Autocad, but if you are intuitively working in a 3d mindset using other tools, that's good too.

To apply, send your resume, portfolio and covering letter briefly addressing the above to [admin@lawarchitects.com.au](mailto:admin@lawarchitects.com.au). If we get to meet you virtually, we would like to talk over examples of your own work. Please only apply if you can make a strong case against this description.
