

Cultural Setting

The studio of Kelly Architects is a multi-talented, collaborative, positive workplace. We learn through our professional team interactions and through the projects we undertake. Strong relationships with clients and consultants are highly valued.

Based in Geelong, Kelly Architects work predominantly in regional Victoria with community groups and non-for-profit organisations. Our buildings are created to reflect and develop the local culture and enhance existing environments.

Project Architect Role

Kelly Architects is seeking an experienced architectural graduate or registered architect to join the team in Geelong in a fulltime or part-time capacity. The role will include working across several educational and small to medium commercial projects.

This position will appeal to a self-directed person who is recently registered or near registration. As projects are predominantly based in regional Victoria, a familiarity of country life and travel is welcomed. It is expected that applicants have a sound knowledge of Revit and hold a Victorian driver's licence.

The role will provide experience across all project stages, working directly with clients, engineers, consultants and builders. Applicants showing experience in managing projects and working independently, having strong documentation and communication skills will be favoured.

Remuneration will be based on experience.

Candidates are asked to email their resume to hello@jkarchitect.com.au
