

## Learning Outcomes – The instillation of vapour permeable membranes

- List the many common points where condensation is present in buildings.
- Explain the NCC 2022 requirements pertaining to:
  - DTS requirements for Condensation Management Part 10.8.1 External wall construction / Pliable Membranes
  - WUFI Modelling required for verification method H4V5 verification of condensation management
  - Verification method H6V3 verification of building envelope sealing / airtightness requirements
- Describe the Red Pen Test and Blower door testing.
