HATZ

designing a future worth living in™

CLIENT SUCCESS
DESIGN EXCELLENCE
INSPIRED PEOPLE

WE'RE HIRING

Graduate of Architecture – Advanced Revit

SOUTH YARRA, MELBOURNE | FULL-TIME

At HATZ, we're **Designing a Future Worth Living In™**: architecture that shapes how **people learn, heal and live**. We're seeking a **Master of Architecture graduate with advanced Revit skills and a passion** for design to join our South Yarra studio with a clear pathway to ARBV registration.

Our work is concentrated where design quality genuinely changes outcomes. We specialise in **education, health** and **bespoke residential**. Much of our work is **adaptive reuse**: honouring what a building has been while unlocking what it can become. That means complex existing fabric, real technical rigour and precise documentation.

That's where you come in: using Revit to model complex existing buildings accurately and turning regulatory constraints into design solutions rather than compromises. At HATZ, precise documentation is more than technical skill; it's how we deliver client success.

WHAT MATTERS TO US

Our values are non-negotiable, and they'll shape how you **work here**:

Client Success
Precise documentation, with low error rates and minimal construction variations, is how we deliver client success and build lasting trust. Your Revit skills are central to this.

Design Excellence
Architecture that is ambitious, practical and beautifully resolved. We never accept "good enough".

Inspired People
We strengthen people so they become confident architectural leaders.

WHAT YOU'LL BRING

- A genuine eye for design resolution, not just modelling.
- A **Master of Architecture (or equivalent accredited qualification), essential.**
- **3+ years' advanced Revit / BIM**, with hands-on experience in:
  - custom parametric families
  - project templates, view standards and model health
  - worksharing in central models
  - consultant model coordination and clash resolution
  - phasing existing, demolition and new work
  - coordinated, construction-issue documentation and schedules
- Working proficiency in **AutoCAD**, rendering, Adobe Creative Cloud and AI tools for design exploration, visualisation and documentation.
- Strong working knowledge of Victorian and Australian regulatory requirements, with the ability to resolve them through design, not just check them off.
- The ambition to grow into an architectural leader and the humility to keep learning.
- A portfolio demonstrating design sensibility alongside technical documentation ability.
- **Full Australian working rights.**

WHAT WE OFFER

- Involvement across the full design process from concept to **completion**, presenting to clients and defending your design decisions.
- Specialist work in sectors where design quality determines outcomes: **tertiary education, health and bespoke residential.**
- Technically rich **adaptive reuse, heritage and accessibility** projects that build genuine specialist expertise.
- We **grow leaders, not just architects**: a Senior Architect mentor from day one and a supported pathway to ARBV registration.
- **$85,000–$100,000 plus super**, commensurate with experience.

If you have the Revit depth, regulatory knowledge and mindset to grow into an architectural leader, we'd love to meet you.

South Yarra, Melbourne

To apply, send your CV and portfolio to **admin@hatz.co**

Please note: We are managing this recruitment directly and do not accept candidate referrals or submissions from recruitment agencies for this role.
