An Introduction To **TAPESTRY**

Australian Institute of Architects September 3, 2020

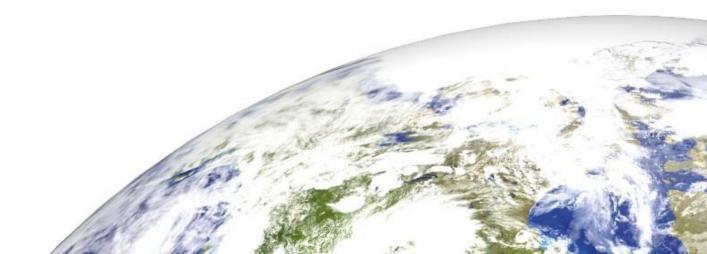

Ken Sanders FAIA

THE OPPORTUNITY

Public disclosure of performance data about **projects**, products and materials helps everyone - designers, engineers, builders, manufacturers, owners and users - better understand, evaluate and enhance design solutions, reduce negative impacts to the environment and increase positive impacts to human health and community resilience.

However, too much information is trapped in **dead-end documents**, scattered among **proprietary databases** with paywalls and conflicting standards, and **disconnected from design software**. This fragmentation has constrained the AEC industry's ability to aggregate and use publicly disclosed information.

RESEARCH + DISCOVERY

CURATION + AGGREGATION

GOOD DECISIONS How is it used to inform good decisions?

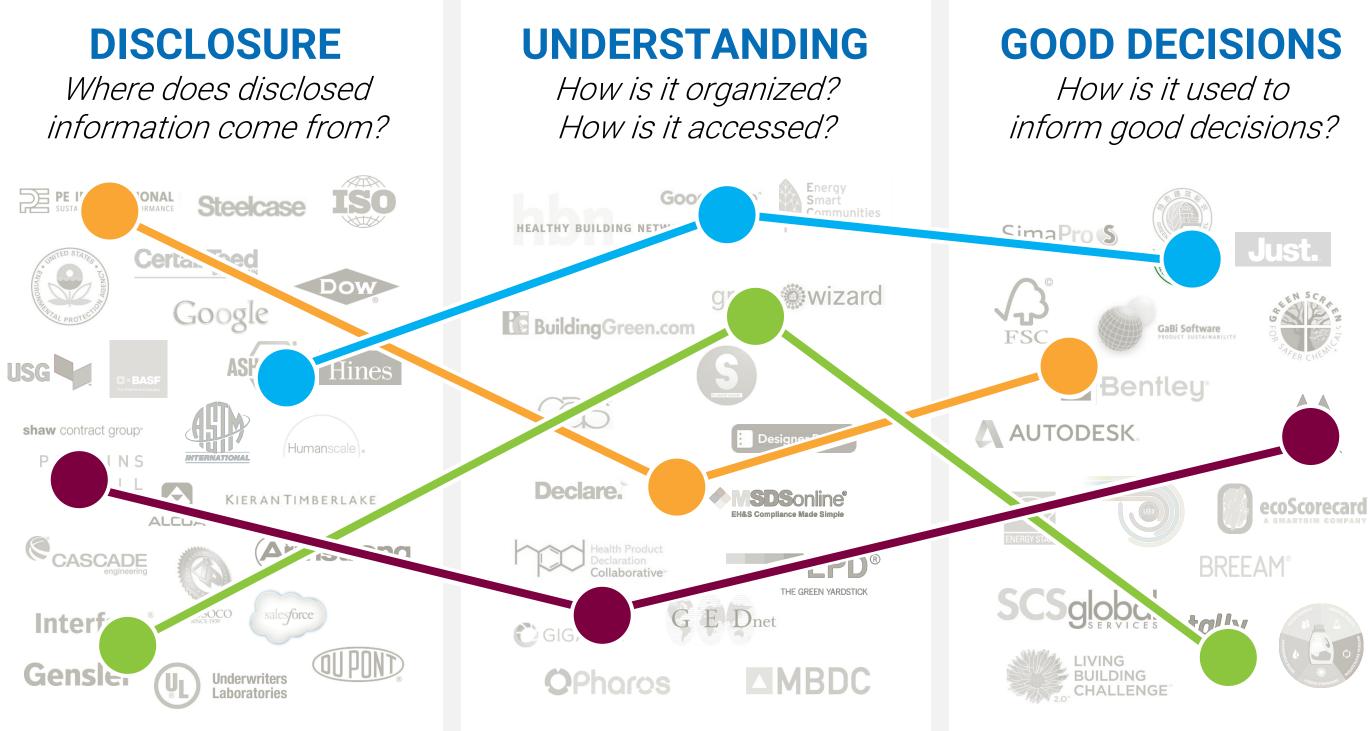

APPLICATION + LEVERAGE

DATA FRAGMENTATION results in **USER FRUSTRATION** and **HIGHER COSTS**

DISCLOSURE

Where does disclosed information come from?

UNDERSTANDING

How is it organized? How is it accessed?

WHAT WE NEED:

OPEN SOURCE DATA

WITH

PUBLIC

INTERFACES

SimaPro

人 AUTODESK.

RESEARCH + DISCOVERY

CURATION + AGGREGATION

GOOD DECISIONS How is it used to inform good decisions?

APPLICATION + LEVERAGE

THIS IS WHAT WE HAVE

THIS IS WHAT WE NEED

AEC DESIGN TRANSPARENCY A NON-PROFIT ORGANIZATION

VISION

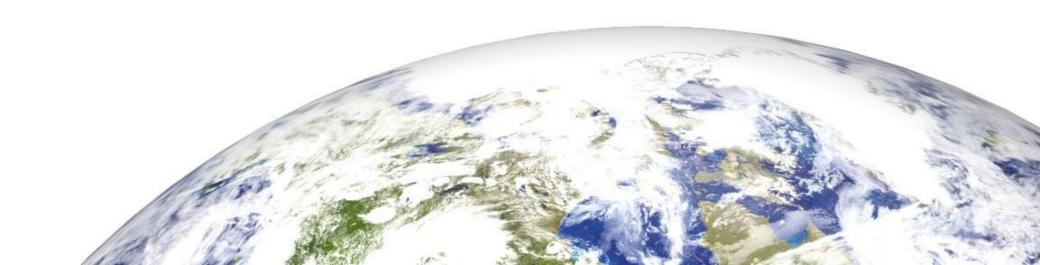

Accelerate the global development of healthy products, sustainable buildings and resilient communities.

MISSION

Integrate and transform design and construction data into freely accessible knowledge that educates and informs.

VALUES

- Community
- Sharing
- Trust
- Scale
- Impact

TAPESTRY A NEW OPEN-SOURCE KNOWLEDGE PLATFORM

TAPESTRY is developed and maintained by AEC Design Transparency through user engagement and a process of continuous improvement.

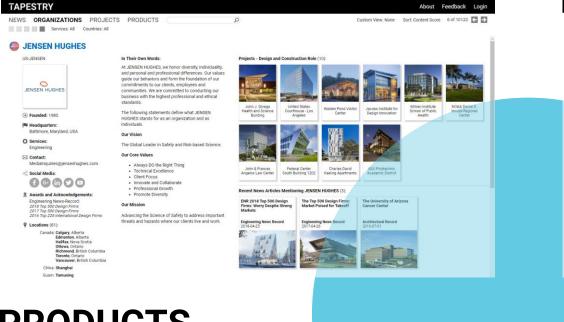

TAPESTRY supports a diverse AEC ecosystem:

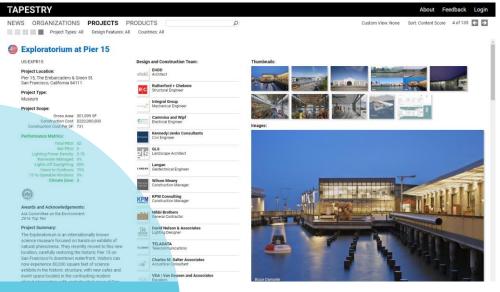

- Architecture, Engineering & Construction Firms
- Real Estate Developers, Owners & Operators
- Product & Equipment Manufacturers
- Certification & Advocacy Organizations
- Digital Design Software Developers
- Distributors, Retailers & Consumers

TAPESTRY weaves together legacy silos into one integrated platform.

In Their Own Words:

Woods Bagot is a People Architecture company. We place experience at the centre of the design process in order to deliver engaging, future-oriented projects that respond to the way people actually use space.

We do this as a global design and consulting studio with a team of over 850 experts working across 17 studios in Australia, Asia, Europe, the Middle East and North America.

Our Global Studio model allows us to work collaboratively across time zones and borders, using the latest technology to share design intelligence and strengthen our knowledge base around the world.

In Their Own Words:

PROJECTS PRODUCTS

We believe in the power of design to change the world.

Smart is beautiful.

"Beauty is a byproduct of solving problems correctly," EHDD founder Joe Esherick once said. That principle guides us to this day. We are problem solvers attracted by programmatic and technical complexity. Our designs are enduring expressions of our clients' unique values.

Design is sensory.

Our architecture sets the stage for lives well lived. We create spaces people lovecomfortable, healthy, and surprising environments that delight the senses and inspire people to live, work, and learn in more productive and meaningful ways.

Innovation is a state of mind.

Sustainability has been at the heart of our work since 1946. For us, design is a vehicle for environmental stewardship, incorporating current technologies to reduce carbon emissions and ultimately reverse climate change.

We believe great design lifts spirits and opens minds, connects people and communities, embraces and protects the environment.

Marrickville Library

Project Type:

Library, Outdoor Plaza

Project Location:

Patyegarang Place, 313 Marrickville Road Marrickville, New South Wales 2204 Australia

Project Scope:

Gross Area: 36,000 SF Construction Cost: \$29,468,000 Cost Per SF: \$819 Levels Above Ground: 3 Levels Below Ground: 1

Design Features:

Floating Canopy Roof, Timber, Daylighting, Skylights, Renovation, Adaptive Reuse

Project Summary:

A community library and multi-purpose facility centered around a new urban park, creating a gateway to Marrickville.

After an invited design competition commissioned for a new library on the old Marrickville Hospital site, Marrickville Council selected BVN architects' concept design. The winning design caters Marrickville's diverse community while remaining sympathetic to the heritage listed (1871-1991) original hospital building.

The new library extended beyond the traditional perception of a public library, catering for Marrickville's diverse community while remaining sympathetic to the heritage buildings.

Keller Center - Harris School of Public Policy

Chicago, Illinois, USA Higher Education, Historic Preservation, Renovation

Frick Environmental Center Pittsburgh, Pennsylvania, USA Education, office, Public Assembly

Leaders of the Harris School of Public Policy sought preservation and restoration of a midcentury masterpiece for their new home on the University of Chicago's south campus. The Commission on Chicago Landmarks identified the Edward Durell Stone design in 1963 as contributing to the historic district of the Midway Plaisance-the spine of the 1893 Columbian Exposition. The transformational redesign integrates policy-inspired solutions to better connect with the community, place policy on display, and serve as an exemplar in sustainable design with LEED Platinum and Living Building Challenge

Austin Central Library

Austin, Texas, USA Public Library, Dining, Bookstore, Art Gallery

The Frick Environmental Center, which opened in September 2016, has welcomed more than 200,000 people, exceeding expectations as a teaching tool and outperforming its models as a net-positive Living Building. The project team, in its commitment to continuing education, has shared lessons learned on the building's performance with a variety of national and regional publications. Presentations on the center have occurred at the Living Future Conference, AIA National Convention, and other regional platforms, with audiences including educators, industry professionals, policy makers, and the

Q

Salesforce Tower San Francisco, California, USA Headquarters, Office Building

The Center for Sustainable Landscapes (CSL) is conceived as a world class building that provides both a home for administrative and classroom functions and a tool to further the institution's stated mission 'to advance sustainability and promote human and environmental well-being through action and research.' This project affords an extraordinary opportunity to demonstrate the positive impact that buildings can have on our environments. The design of the CSL applies traditional best practice strategies to the unique context and requirements of this project. High goals were set for the

Total Recycled Content % Pre-Consumer Recycled Content % Post-Consumer Recycled Content %

Notes:

Pre-Consumer Reycled Content (Prec) is defined as material diverted from the waste stream during the manufacturing process. Excluded is reutilization of materials such as rework, regrind or scrap generated in a process and capable of being reclaimed within the same process that generated it. *Source: ISO 14021:2016(E)*

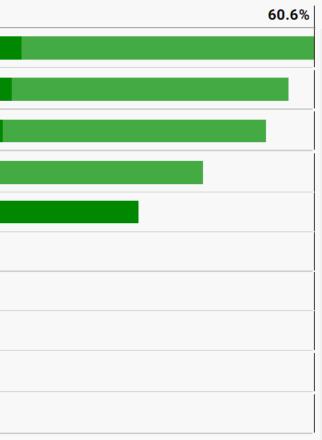

Post-Consumer Recycled Content (PostC) is defined as recyclable material generated by households or by commercial, industrial and institutional facilities in their role as end-users of the product, which can no longer be used for its intended purpose. This includes returns of material from the distribution chain. *Source: ISO 14021:2016(E)*

Legend:

Total Embodied CO2 (kilogram equivalent) per square meter of product

Notes:

Each Embodied CO2 value represents the Global Warming Potential of the product's Cradle-to-Gate [A1-A3] manufacturing processes, including Raw Material Extraction, Processing and Production. Each value excludes the Global Warming Potential of the product's transport to the construction site, installation, use and disposal.

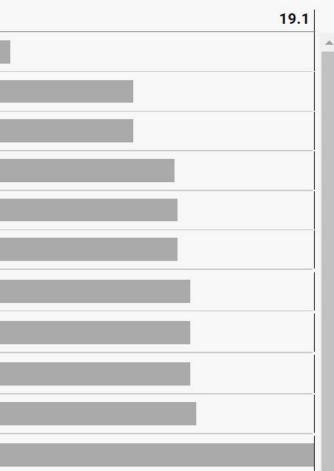

These values are typically published in the Environmental Product Declaration (EPD) of each product. The methodologies used to calculate them may differ between different EPD program operators. In addition, changes to product manufacturing processes implemented after the EPD publication date may or may not be reflected in these values.

Therefore, the Embodied CO2 values shown here should be considered good-faith estimates useful for comparisons, but they are not precise values.

No, the Pandemic Is Not Emptying **Out America's Cities**

Curbed 2020-08-31

Despite what cable news is saying every day, a mass migration to the suburbs isn't happening.

Over the weekend, the New York Times published a story about how there are bidding wars for homes in tristate area suburbs, and how urban apartment dwellers (especially those with kids) are worried about the uncertainties of living in crowded cities come winter. It's the latest piece to explore the impacts of COVID-19 on national housing markets, and seems to support the theory that cities are being abandoned en masse in favor of suburbs. This theory has frequently been posited by the

Excerpt:

The Australian Institute of Architects announced the winners of the 2020 South Australian Architecture Awards via a live broadcast on 2 July.

The jury handed out 39 honours, with projects that had a considerable impact on the communities they serve doing particularly well.

"With site visits replaced by online interviews, jurors rose to the challenge and were able to debate and remotely explore the merits of the entries," said SA chapter president Tony Giannone.

"We have all had to adapt and be flexible to a different delivery mode for the Awards Program this year, however we're confident in the process and proud to deliver the
