

# WORKSHOP ARCHITECTURE

Based in West Melbourne, Workshop Architecture is an architectural, interior design and urban design practice with an established reputation for an innovative design in the public and private sectors. We are committed to creating well-crafted, technically resolved projects with strong conceptual agendas. We provide a supportive studio environment where our ambitions as a practice are pursued in good humour and with great care.

We are looking for a Graduate of Architecture to join our practice. The position will be an ongoing full-time role, assisting in the design and documentation of new health, residential and education projects. Though initially your contribution will be as part of small teams, our intention is for you to play a lead role on smaller projects, working closely with a director. Wherever possible, we maintain the same team throughout the life of the project, from feasibility to completion of construction.

Whether you are newly graduated or already have some industry experience, we're looking for someone with the ambition to become an all-rounder, able to develop a building from its concepts to a well-crafted realisation. Strong graphic and visualisation skills will be advantageous, proficiency in Revit is important as we use it across all scales of projects.

Our practice pursues a diverse range of projects. From education and Indigenous health and culture, to tourism, emergency services and the visual arts, we value every opportunity to contribute to public architecture while also enjoying the detailed, personal nature of private residential design. We also collaborate with larger practices to participate in projects of greater complexity and scale.

As a studio of eight, we offer a lively and supportive environment: assisting towards registration, discussion and tours of practice projects, a mentor to help you learn the office's systems and procedures, social and cultural events.

Please contact Workshop Architecture at [mail@workshoparch.com.au](mailto:mail@workshoparch.com.au) to register your interest and forward CV and portfolio prior to Tuesday 13.01.2026. Following an interview, the successful applicant will ideally commence early in February 2026.
