

WORKSHOP ARCHITECTURE

Workshop Architecture is an architectural, interior design and urban design practice with a reputation for innovative design across diverse public and private projects.

We are dedicated to a contemporary position in architecture, along with a commitment to creating well-crafted, technically and conceptually resolved projects. We provide a supportive studio environment where our ambitions as a practice are pursued in good humor and with great care.

Workshop Architecture is looking for a Project Architect to join our practice. The position is full-time and is to play a key role on a new education project. Alongside this project there will be opportunities to lead and contribute to a variety of project types, from educational and public buildings, to residential architecture and exhibition design. As part of a practice of ten, you will operate in small teams and work closely with each director.

The role is most suitable for a person of 3-5 years' experience. We use Revit across all scales of projects so skills with that program are preferred.

Please contact Workshop Architecture at mail@workshoparch.com.au to register your interest and forward CV prior to Friday 12.04.2021.

Following an interview, the successful applicant will commence as soon as possible.
