
ARCHITECT OR GRADUATE POSITION VACANCY

PRACTICE DESCRIPTION

Yarra Architects is a small, locally-focused practice based in the Dandenong Ranges. We work closely with our clients and find practical solutions to challenging sites which often feature bushfire overlays, significant vegetation and steep slopes. Our work stretches across a variety of landscapes including the urban fringe of Melbourne's Eastern Suburbs, the steep slopes of Mt Dandenong and the rural areas of the Yarra Valley and Warburton.

JOB DESCRIPTION

We are on the lookout for someone to grow the Yarra Architects team from 2 to 3. That means someone who is able and willing to work collaboratively in a small team across a broad range of residential projects and at all stages (concept through to building permits and contract administration). Open to graduates or registered architects with remuneration to match experience, but strong ArchiCAD skills are essential.

The ideal candidate would be:

- Dedicated to producing high quality and well-coordinated drawing packages.
- Willing to get on board with a client-first approach, which means exploring options and carefully guiding clients through the whole design and construction process.
- Self-motivated and able to problem-solve.
- Organised and dedicated to achieving goals.
- A great communicator and team player.

Bonus points for:

- Local applicants based in or around the Dandenong Ranges who have a passion for our area and an understanding of the opportunities and constraints that come with it.
- An understanding of bushfire regulations.
- Background in landscape or interior design.

Full time position, based in Tecoma.

EXPERIENCE NEEDED

Minimum 3 years Australian post-graduate experience.

Minimum 3 years ArchiCAD experience in a professional capacity.
